

Clearspan Roller Shutters

Clear and secure shutters allowing viewing of your products day and night

Description

Metalbilt's Clearspan Roller Shutters are custom-made to fit the size of your opening and structure. These clear and secure shutters allow high visibility of your shop front and can be designed to operate manually or with a motorised system.

Product Information

Clearspan Roller Shutters can be customised to suit your business with a range of powder-coating colours to suit your brand.

Clearspan Roller Shutters are ideal for any project where you desire clean lines and visibility such as:

- Bar tops
- Counter tops
- Shopfronts
- Pedestrian openings
- Arcades

Technical Specification

Standard

- Joined with extruded aluminium rails at 100mm centres.
- Constructed from UV resistant polycarbonate slats.
- Fitted with nylon endlocks to prevent lateral movement and assist operation.
- Flush mounted locking with various keying options available.
- Low side room option for tight installations.
- Fixed and removable mullion options available.
- Operate manually by spring balance or with motorised system (incorporating automatically engaging hand chain for power failures).
- Slats and joining rail can be replaced individually if damaged.

Finish

Clear anodised or powder-coated
