

Security Rolling Grilles

METALBILT SHUTTERS

Your choice of light or heavy-duty rolling security grilles to suit your needs.

Metalbilt's Security Rolling Grilles are custom designed to suit and come in two sizes – light duty 12mm aluminium tube or heavy duty 19mm aluminium tube. Both grilles are curtain assembled from tubes and moulded nylon links into a brick pattern for added strength.

OVERVIEW

Available in a range of finishes and colours and custom-made to suit the size of opening.

APPLICATIONS

12mm tube light duty grille recommended for:

- Bar tops
- Counter tops
- Shop fronts
- Pedestrian openings
- Arcades

19mm tube heavy duty grille recommended for:

- Carparks
- Shopfronts
- Large pedestrian openings
- Industrial buildings

SPECIFICATIONS

- Tubes and links can be replaced individually if damaged.
- Helically wound torsion springs counterbalance the weight of the curtain.
- Flush mounted locking with various keying options is available.
- Operate manually by spring balance or with motorised system (incorporating automatically engaging hand chain for power failures).
- Low side room available for tight installations.
- Low side room and overhead motorising option available.
- Fixed and lift out mullions available.
- Fixed panels available.

SKIN THICKNESS

12 mm tube size:

- Maximum width – 5.5 metres
- Maximum height – 4 metres

19 mm tube size:

- Maximum width – 10 metres
- Maximum height – 5 metres
- Maximum opening – 40m²

FINISH

Clear anodised or powder-coat available.
