

Steel Roller Shutters

METALBILT SHUTTERS

Strong and durable industrial steel shutters in a range of designs.

Metalbilt's Steel Roller Shutters are engineered using the latest computer modelling techniques, providing a durable roller shutter for many commercial and industrial applications.

OVERVIEW

Available in a range of finishes and colours and custom-made, the slat type door on these steel roller shutters makes them superior to continuous sheet type doors.

APPLICATIONS

Steel roller shutters are ideal for projects where strength and durability is required including:

- Factories
- Warehouses
- Carparks
- Shop fronts
- Industrial buildings

SPECIFICATIONS

- Assembled from roll-formed galvanised steel interlocking slats.
- Slats can be replaced individually if damaged.
- Guides are roll-formed galvanised steel, with the choice of standard or wind locked.
- Helically wound torsion springs counterbalance the weight of the curtain.
- Operate manually by spring balance or with motorised system (incorporating automatically engaging hand chain f or power failures).
- Wind locks are recommended for openings over 5m wide or where extra security is required.
- Low side room and overhead motorising options available.
- Vented and perforated curtains available.
- Hinged and sliding mullions available.
- Wicket gates available.

SIZE

- Maximum width – 8 metres
- Maximum height – 7.5 metres
- Maximum opening – 45m²

FINISH

Standard cold rolled galvanised or powder-coated.
